Experience

Katmai Government Service, Orlando, FL

April 2024 – Present

Unity Developer II

- Developed tooling used to create consistent appearance and quality of gameplay enabling sub-contractors to easily maintain the level of excellence expected
- Used Git version control to maintain and distribute a Unity Package Manager (UPM) package for that tooling across teams and companies to support our sub-contractors
- Used my own tooling package to design and deliver quality eLearning for the U.S. Navy
- Created an in-engine web/document browser with OS native web support through the use of Microsoft's new WebView2 SDK
- Established and maintained coding and documentation standards
- Adhered to an Agile workflow consistently finishing sprints, doing sprint reviews, and maintaining cohesion through scrum meetings during those sprints

Carley Corporation, Orlando, FL

September 2019 – April 2024

Unity Developer II

- Was given free reign to design the tools and processes that the company would adopt using Unity going forward as for the first two years I was the only Unity developer on staff.
- Used Finite State Machines to control the state of a simulation which reduced the number of player actions that needed to be tracked and allowed seamless reverse functionality, such as going back to the start of a lesson if a student failed or going back to a previous step if they still had questions.
- Developed an Event Bus system with ScriptableObjects at its core that helped to reduce Update calls, dependencies, and development time.
- The processes and tools I created enabled the company to rapidly and repeatedly deliver quality products to customers which in turn led to multiple new contracts specifically asking for more of those products.
- Five time winner of Employee of the Month.

Free-Lance Software Programming

May 2015 – Present

Owner, OdincoGaming

- <https://github.com/OdincoGaming/PublicTransportation> Unity, C#, Algorithms, Physics Simulation, Multi-threaded Optimization
- <https://odinco gaming.github.io/BluesBus/> Unity, C#, shaders, optimized for mobile web browsers, some JavaScript, html, and css
- <https://github.com/OdincoGaming/FlowerProject> Unity, C#, JavaScript, html, and css, mobile browser support
- <https://github.com/OdincoGaming/ScriptableWeaponsAssetExample> C#, Unity, Use case example for ScriptableObjects as a tool for designers to create, animate, and customize wieldable items without needing to code.
- <https://github.com/OdincoGaming/AlgorithmicStockBot-Web> Python, JavaScript, html, css, ReactJS, Final project for school. Why stress about the

stock market when a robot can for you?

- Attendee at Unite 2022 and GDC 2023 as well as several Unity developer meetups at the Unity office in Austin, Texas

Provalus, Brewton, AL

December 2018 – September 2020

IT Help Desk, contracted out to WestRock

- Provided tier 1 network security through FireEye and Malwarebytes.
- 99% up-time quality IT service for the entire US division of WestRock.
- Use of ServiceNow and Windows Servers to provide fast and reliable solutions to technical problems.
- Support for industry applications such as JD Edwards, Kiwiplan, and Oracle applications.

Education

University of Central Florida, Orlando, FL

January 2020 – June 2020

Full Stack Web Development Bootcamp

Certificate of Completion, available at [My LinkedIn](#)

Harvard, edx.org

March 2019 – December 2019

CS50, Computer Sciences Certificate

Certificate of Completion available at [My LinkedIn](#)

Skills

Programs: Unity3D, Adobe Animate and Photoshop, Heroku, SQL Server

Languages: C#, Javascript, HTML, CSS, Python, C

Other: Flask, Django, React, Linux and Windows OS

Attached are some character references written by those listed above

It is with great enthusiasm that I provide a character reference for Freddy Lyle, a highly skilled and creative Unity programmer. Freddy was a key member of our development team, where his technical expertise, problem-solving abilities, and creativity consistently impressed both his colleagues and leadership.

Freddy possesses an exceptional understanding of Unity 3D and the wide array of plugins associated with it. Whether it was developing complex gameplay systems, optimizing performance, or integrating advanced third-party tools, Freddy always approached each task with precision and a deep understanding of the platform. His ability to troubleshoot and devise solutions to difficult problems set him apart as someone who thrives on challenges and delivers exceptional results.

In addition to his technical skills, Freddy's creativity shines in his work. He has a knack for looking beyond the obvious and finding innovative ways to enhance projects, both functionally and visually. His contributions were instrumental in elevating the quality and impact of the projects he worked on.

Freddy is also an excellent team player. He communicates clearly, collaborates effectively, and is always willing to share his knowledge and mentor others. His positive attitude and dedication made him a pleasure to work with, and he was someone the team could always rely on.

I wholeheartedly recommend Freddy for any Unity programming or related position. He brings a rare combination of technical skill, creativity, and problem-solving ability that would make him an asset to any organization. If you have any further questions, please don't hesitate to reach out.

To anyone who wants to know more about this amazing guy:

Frederick Lyle is an invaluable asset to any environment he's a part of. When I first met him, I was re-entering the workforce after raising a family and held a junior position. My manager asked me to learn Unity, and Freddy graciously took on the role of my teacher, showing me everything I needed to know. His teaching style was thorough, and he always emphasized the importance of staying up-to-date with the best design practices, often pointing me towards Unite talks.

As I transitioned into a lead role, Freddy seamlessly adapted to our changing dynamic. I believe many people might struggle with switching from a mentor role to being led by the person they once mentored, but Freddy handled it with the utmost professionalism. Our agile team works exceptionally well together; we can pair program, manage timelines, and I still rely on Freddy's expertise for more complex Unity questions.

Freddy's love of learning and ability to recall information has earned him the nickname "almanac" among our team. He consistently challenges himself to grow as a developer and also as a human. On our team, we have worked hard to foster an environment where we can communicate openly, express our needs, and adapt based on constructive feedback. His self-reflective nature allows him to evolve as both a professional and a person, a trait that I consider invaluable.

I've always been impressed by Freddy's dedication and enthusiasm, and I have no doubt he has the potential for great success. While I'd love to have him on my team forever, I recognize that his passion may lead him in different directions, and I have no intention of holding him back.

To whom it may concern,

Character Reference for Fredrick Lyle

I am writing this letter to acknowledge and commend Freddy's hard work and dedication while at Carley Corporation. As his Team Lead, I had the pleasure of witnessing his growth and development, and I am proud of the contributions he made to our team.

His work ethic was exceptional, and his commitment to achieving our goals was unwavering. Freddy had consistently demonstrated a keen attention to detail and a willingness to go above and beyond to ensure that our projects were completed to the highest standards, helping to advance our standards and come up with unique solutions to challenges.

His technical skills are exemplary and showed a remarkable ability to learn quickly and adapt to new challenges. Contributions to our team have been invaluable, and a positive attitude and willingness to collaborate helped to foster a supportive and productive work environment.

Freddy is always working to help others with knowledge and growth in our practices and procedures which he helped with or developed to streamline production tasks. He is an asset to have for motivation, production strategies and pipeline tasking.

Sincerely,

Thomas Freeman
